

VPN Instructions - Windows XP

1. Choose & download the correct Windows Cisco VPN client. There are 3 to choose from:
If you need access to the academic network use:
http://oak.conncoll.edu/VPNClients/Win_Academics.exe
For access to the Administrative network from on campus use:
http://oak.conncoll.edu/VPNClients/Win_Admin_OnCampus.exe
For access to the Administrative network from off campus use:
http://oak.conncoll.edu/VPNClients/Win_Admin.exe
1. Run the file when it has downloaded, and install the VPN client. You may need to restart when the installation has finished.
2. Once your computer has restarted, run the client.
3. Choose the network that you would like to connect to.

4. Press Connect, and enter your username and password.

5. When the client is connected, you will see a small lock icon in the bottom right corner of the screen.
