Material Safety Data Sheet

Ilmenite Sand

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Identification
Product Names: Florida Ilmenite, Virginia Ilmenite, Capel Ilmenite, Eneabba Ilmenite
Other Names: Ilmenite
Chemical Formula: FeTiO$_3$

Company Identification
Company: ILUKA Resources Inc.
Address: Florida Operations: 1223 Warner Road, Green Cove Springs, Florida 32043 – 4623 USA
Virginia Operations: 12472 St John Church Road, Stony Creek, Virginia 23822 - 3239 USA
Telephone Number: (904) 284 9832, (434) 246 8016
Fax Number: (904) 284 4006, (434) 246 3039
Emergency No: (904) 284 9832 (24 hours), (434) 246 8016 (24 hour)

2. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients (typical) | CAS Number | Weight %
---------------------|------------|---------
Ilmenite             | 93 – 96%   |         
Rutile/Leucoxene     | 14940-68-2 | 0.5 – 5% 
Zircon               |           | 0.1 – 0.5% 
Monazite             | 12182-56-8 | 0.2 – 0.3% 
Staurolite           |           | <1%     
Quartz               | 14808-60-7 | Up to 0.5% 

3. HAZARDS IDENTIFICATION

Not classified as hazardous according to US Agency for Toxic Substances and Disease Registry and the American Conference of Governmental Industrial Hygienists

Potential Health Effects

Acute
Swallowed: Non-toxic. There are no known hazards resulting from accidental ingestion of Ilmenite Sand as may occur during normal handling. Swallowing a large amount may result in irritation to the digestive system due to abrasiveness
Eye: Solids and dust can be moderately irritating due to abrasiveness
Skin: Low hazard.
Inhaled: The normal grain size of the product precludes it from being an inhalation hazard. Handling can however fracture grains, and in the dry state this can generate dust. This is normally regarded as general nuisance dust, but can be irritating if inhaled at high concentration. May cause symptoms such as coughing or sneezing.
**Chronic**

Silica  
Crystalline silica is a known cause of lung fibrosis (silicosis). It has also been classified as a human carcinogen. (International Agency for Research on Cancer). Ilmenite Sand contains a small amount of free quartz, (up to 0.5 %) and precautions should be taken to avoid inhaling the dust.

Radiation  
In common with many minerals, Ilmenite Sand contains very low levels of naturally occurring radioactive elements of the uranium and thorium series. The main radiological hazard from the product is internal exposure to small amounts of alpha particles given off by inhaled dust. Low level gamma radiation from bulk or bagged stockpiles of Ilmenite Sand may present a lesser, external hazard. Iluka Ilmenite Sand is exempt from NRC regulations for source material per 10 CFR 40, since it falls under the definition of unprocessed material containing less than 0.05 % uranium and thorium.

General  
The main route of entry into the body is by inhalation of dust.

**Carcinogenic Information**
The following components are listed by the IARC, NTP, OSHA and ACGIH as carcinogens. A "P" indicates a proposed carcinogen.

4. FIRST AID MEASURES

**Swallowed**  
First aid is unlikely to be required, but if necessary wash mouth out with water ensuring the mouthwash is not swallowed. Seek medical attention as a precaution if discomfort occurs.

**Eye**  
Hold eyelid open and flush with plenty of clean water. Continue for at least 15 minutes or until grit is removed. Seek medical attention if soreness or irritation persists.

**Skin**  
Gently remove contaminated clothing to avoid generating dust. Wash material from the skin. If repeated contact results in skin irritation, seek medical advice. Launder clothing before re-use.

**Inhaled**  
Move to fresh air. Blow nose to remove particulates from nasal passages. If any adverse reaction develops, seek medical attention.

**First Aid Facilities**  
Eye wash facilities.

**Advice to Physician**  
Treat symptomatically.

5. FIRE FIGHTING MEASURES

**Flashpoint**  : Not applicable

**Flammability Limits**  : Not applicable

**General Hazard**  
This product is not flammable and does not support combustion.

**Extinguishing Media**  
Use media suitable for the material that is burning.
6. ACCIDENTAL RELEASE MEASURES

Spills and Disposal
Wear safety equipment as for normal handling. Avoid generating dust. Vacuum up if possible, otherwise sweep up and re-cycle. If the spilled product is not suitable for re-use, damp down, collect and where possible return to manufacturer for re-processing. Otherwise dispose of to an approved landfill site and cover with clean fill in accordance with State/Local Council regulations.

7. STORAGE AND HANDLING

Handling (Personnel)
Avoid breathing dust. Wash thoroughly after handling.

If handling respirable flour it is advisable to use gloves and wash hands before eating, drinking or smoking to minimise inhalation or ingestion from hands.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls
Ventilation requirements will depend on handling methods and the amount in use, but should be sufficient to maintain dust levels below exposure limits. Points of dust generation such as conveyor and hopper discharges should be equipped with an effective extraction system.

Personal Protection
Safety glasses with side shields or goggles. If risk of inhaling dust is present wear, at minimum, a dust mask (disposable or cartridge type).

Exposure Standards
Inhalable general nuisance dust:
\( ^1 \text{TLV, Occupational) TWA} = 10\text{mg/m}^3 \) (ACGIH)
Respirable quartz dust:
\( ^1 \text{TWA} = 0.1\text{mg/m}^3 \) (ACGIH)

\(^1\) TLV (Threshold Limit Value) is the exposure standard term used by American Conference of Governmental Industrial Hygienists (ACGIH)

Radiation Exposure
Occupational exposure should be as low as reasonably achievable, (ALARA principle), but should not exceed a total of 100 milli-seiverts over five consecutive years. (ICRP).

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance (Form): Black free running sand, odourless and tasteless
Melting Point: 1050\(^\circ\) C
Vapour Pressure: Not volatile
Evaporation Rate: Not volatile
Specific Gravity: 4.3 - 4.6
Solubility in Water: Insoluble
pH: Neutral
Bulk Density: 2400 - 2700 kg/m\(^3\)
Grain size (AFS No): 75 - 90

10. STABILITY AND REACTIVITY

Reactivity: Inert
Chemical Stability: Stable
Incompatibilities: None in normal or expected use.
Decomposition: Decomposition will not occur.
11. TOXICOLOGICAL INFORMATION
No toxicological information available.

12. ECOLOGICAL INFORMATION
The material is unlikely to cause any environmental damage. It is insoluble in water and is unlikely to contaminate waterways or food chains.

13. DISPOSAL CONSIDERATIONS
Disposal must be in accordance with Federal, State and Local Council regulations. If approved, may be transferred to an approved landfill site.
Note: Many states are developing new regulations for the disposal of waste containing Naturally Occurring Radioactive Materials (NORM) or Technologically Enhanced Naturally Occurring Radioactive Materials (TENORM) above background levels. Consult and comply with current regulations.

14. TRANSPORT INFORMATION
May be transported normally as a non-hazardous material.

15. REGULATORY INFORMATION
U.S. Federal Regulations
TSCA Inventory Status : Reported/Included
TITLE III HAZARD CLASSIFICATIONS SECTIONS 311, 312
Acute : No
Chronic : Yes
Fire : No
Reactivity : No
Pressure : No

LISTS:
SARA Extremely Hazardous Substance : No
CERCLA Hazardous Material : No
SARA Toxic Chemical : No

16. OTHER INFORMATION
For further information see Iluka Ilmenite Product Specification Sheets

Note: This product contains small quantities of quartz and radionuclides, both known to the State of California to cause cancer.

Preparation Information
This MSDS has been prepared by Iluka Resources Inc, Safety Health and Environment Department.
