SUMMARY
We found reliable information about the employment and graduate school activities of about 87% of the Class of 2013. Five years after graduating from Connecticut College, about 96% of those for whom we found information were employed, in graduate school, or recent graduates of a degree program. Our students follow a variety of post-undergraduate pathways into jobs, fellowships, internships, degree programs, and non-degree coursework, and nearly half of the Class of 2013 has obtained some form of additional education.

OVERVIEW
Colleges and universities are now routinely expected to collect and report “outcomes” data on their graduates, primarily on employment, salaries, and graduate and professional school attendance. Collecting accurate data on a large portion of a graduated class is tricky, and there is currently no consensus on the best time or method for collecting the data. The National Association of Colleges and Employers has developed a voluntary “first destination” survey that they suggest administering six months following graduation, although that timeframe seems primarily aimed at answering the question of how many college graduates quickly secure employment and thus the ability to begin paying off student loans. While important, this is not the only outcome we should be interested in, particularly as an institution offering a liberal arts education, the fruits of which may take years to fully appear. Thus, a longer-term view that looks at graduates’ activities one or more years after graduation has been the approach taken by Connecticut College in our one-year-out and five-year-out studies.

Following the methodology used in a five-year-out study of the Class of 2008, we undertook a study of the 446 members of the Connecticut College Class of 2013. While we continue to administer our one-year-out survey, we think that five years after graduation, the career trajectories of our alumni are much clearer than they appear during the highly dynamic year following graduation. Moreover, as a liberal arts institution, we ought not expect all of our students to find employment related to their major immediately following graduation—in fact, more and more employers seem to value the liberal arts degree for what it implies about a graduate’s skills and are placing relatively less emphasis on the individual’s major, meaning there is a breadth of career

1 For its annual rankings enterprise, U.S. News and World Report asks institutions for the percentage of graduates who pursue graduate study immediately, within one year, and within five years; a breakdown of their fields of study; the “graduate schools most commonly attended by your recent graduates”; and the “percentage of graduates who enter job market in field related to major.” The federal government launched a College Scorecard website in 2013 that does not contain data on employment outcomes per se but contains data on student-loan repayment and average salary of graduates. See https://collegescorecard.ed.gov/
2 See http://www.naceweb.org/job-market/graduate-outcomes/first-destination/
Five years out, many alumni have found their way into jobs that look like careers rather than transitional positions, and many are pursuing or have completed graduate or professional degrees. As such, we believe that a five-year-out look at our graduates provides a meaningful snapshot of their post-graduation endeavors.

**METHODOLOGY**

We conducted Internet searches of the entire Class of 2013 (which located a current LinkedIn profile for about 78% of alumni), queried the National Student Clearinghouse database to reveal post-Connecticut College enrollments of our alumni, and sought information from our career services office. The research was carried out over about five weeks to create a snapshot-in-time of these graduates’ activities as of early summer 2018. The study did not include a survey of the graduates, since those efforts typically get low response rates and the basic information we sought was discoverable through public sources.

**RESULTS**

These searches produced verifiable and current information for 387 of the 446 members of the Class of 2013 (about 87%), as shown below. This far exceeds what could be expected from even a very aggressively administered alumni survey. To ensure the quality of the data, a stringent “standard of proof” was used to assess the validity of the information we found. Alumni were counted as employed only if we found evidence that they were currently employed (e.g., a LinkedIn profile listing a job held up through “the present” or an employer’s website listing the individual). Individuals with a LinkedIn profile listing prior employment with an end date were counted as “between jobs” rather than employed. Alumni were counted as “in graduate school” only if we found evidence of enrollment for the spring 2018 semester. Many of the “no record found” alumni were located on Facebook, but current activities were either not indicated or were not accessible due to the individual’s privacy settings. In addition, students for whom we found record of a degree earned in May 2018 but who have yet to start work or enroll in another program were counted as “recent graduates.”

According to a 2014 report by the Association of American Colleges and Universities, 93% of employers agreed that “candidates’ demonstrated capacity to think critically, communicate clearly and solve complex problems is more important than a person’s undergraduate major.” The article also reported that 4 in 5 employers claimed all students should “acquire broad knowledge in the liberal arts and sciences.” See https://www.aacu.org/sites/default/files/files/LEAP/nchems.pdf
Using the standard practice of reporting the percentages of the various “current activities” of just those alumni for whom we found information (i.e., on the assumption that we can extrapolate the results to those we could not locate), the results are as follows:

**FIG. 1.** Current activities of the 387 Class of 2013 alumni for whom we found information

For the Class of 2013, then, 96.1% of alumni for whom we found information were either working, in graduate school, or had earned a degree within the prior month. If we add volunteering and interning to these categories, the number grows to 97.4%. Although these categories are treated here as mutually exclusive, some graduates were both working and enrolled in a graduate program or coursework. Based on the information we could find,
a judgment was made regarding which activity appeared to be the person’s *primary* activity. The full details of current employment of graduates are shown in Appendices 1 and 2 (sorted by the students’ undergraduate majors and by their occupational field, respectively) and the details of their graduate or professional school degrees are shown in Appendices 3 and 4 (sorted by the students’ undergraduate majors and by the graduate institution, respectively).

**WHAT OCCUPATIONAL FIELDS ARE ALUMNI CURRENTLY WORKING IN?**

To provide a general picture of the types of work our alumni do, industry or occupational categories were assigned to each currently employed graduate (including those with part-time work and those who are self-employed), as well as the small number who are interns or volunteering. Depending on what sort of role or position a person holds and the type of firm or organization they work for, a judgment was made regarding the appropriate category. For instance, an individual who works for a pharmaceutical company, but in human resources, would be placed in the Management, Business and Financial category. This may account for the large portion of alumni in this category (close to 35%), because it includes a wide array of different roles; those in the financial sector, business development, and most managerial positions. It is also interesting to note the large percentage of alumni who work in education as well as science, tech or engineering (12.7% and 10.1%, respectively).

**EXAMPLES OF OUR STUDENTS’ POST-GRADUATION PATHWAYS**

Summary statistics regarding jobs held and graduate degrees earned are useful but don’t provide a full picture of the interesting, impressive, and admirable uses to which our graduates put their liberal arts educations. To do justice to the rich and sometimes quirky variety of our graduates’ activities, we need to recognize the varying forms and sequences that their post-graduation activities take. What follows is a typology of post-college pathways that we found reflected in our students’ five-year-out activities, with examples of each.
Immediate post-graduation employment in a field related to the student’s major
- A Computer Science major, hired in July 2013 as a Software Development Engineer by Amazon, where he remains.
- An Economics major, hired in May 2013 as a Financial Analyst by Morgan Stanley, where she remains, now a Manager.
- An International Relations major, hired in May 2013 as a Fellow by the UN, where she remained for five months before completing a Master’s degree at the University of Oxford.

Immediate post-graduation enrollment in a graduate program
- A Biological Sciences major, enrolled in a PhD Program in Cellular and Molecular Biology at the University of Connecticut in August 2013, and expects to complete her degree in 2019.
- A Biological Sciences major, enrolled in a Doctor of Veterinary Medicine program at the University of Pennsylvania in August 2013, completed her degree in May 2017, and is currently an Associate Veterinarian at Yalesville Veterinary Hospital.
- An Anthropology major, enrolled in an M.S. program in Speech-Language Pathology at Boston University in August 2013, completed her degree in May 2015, and is currently a Speech-Language Pathologist at the Center for Speech and Language Disorders in Chicago, IL.
- An Economics major, enrolled in an M.A. program in Economics at the University of New Mexico in August 2013, completed his degree in May 2015, and is currently a Research Analyst at Barings.

Employment plus graduate school simultaneously
- An Architectural Studies and Psychology majors, has worked at CBRE [CB Richard Ellis] New England as a Communications Coordinator in Boston, MA since September 2017 and enrolled in an MBA program at Boston University in August 2015 with degree expected in 2019.
- A Government major, worked for Travelers as a Law Clerk in Hartford, CT from June 2014 to May 2015 while enrolled in a JD program at the University of Connecticut School of Law, degree earned May 2016. She is currently an Associate Attorney at Rogin Nassau LLC in Hartford, CT.

Graduate school followed by employment
- A Biological Sciences major, earned an M.S. in Fish and Wildlife Biology from SUNY College of Environmental Science and Forestry in December 2015 and has worked at AECOM [Architecture, Engineering, Construction Operations and Management] as an aquatic biologist in Conshohocken, PA since March 2016.
- A Biochemistry major, earned an MD degree from the University of Pittsburgh School of Medicine in May 2017 and has worked at The Children’s Pediatric Hospital of Pittsburgh as a Pediatric Resident since June 2017.
- A Biological Sciences major, earned a Doctor of Physical Therapy degree from the University of Vermont in May 2017 and has worked as a Physical Therapist at the University of Utah Health Hospitals and Clinics since August 2017.
- A History major, earned a JD from the University of Virginia School of Law in May 2017 and has worked at Winston & Strawn LLP since October 2017, first as a Law Clerk and now as an Associate Attorney.

Employment followed by graduate school
- An International Relations and Economics majors, worked in North American Regional Financial Planning and then as a Senior Analyst at Boston Consulting Group from February 2014 until September 2017 and then enrolled in a Master of Public Administration program at the London School of Economics in September 2017 with degree expected in 2019.
• An English and Classics major, hired as an ESL teacher at the Westtown School in Westtown, PA in July 2013, then enrolled in an M.A. program in English Language and Literature and received her degree in May 2015; currently a PhD in English Language and Literature candidate at the Ohio State University.
• A Government major, hired as a District Sales leader at PepsiCo - Frito Lay in June 2013, and is currently enrolled at Boston College in an MBA program.
• A Religious Studies and Anthropology major, hired as a Legal Assistant/Paralegal at MT Law, LLC in February 2014 and is currently enrolled at the University of Chicago Law School in a JD program.

Employment followed by graduate school followed by a better job
• An English major, worked several legal assistant/paralegal/clerk positions in the New York area from 2013 to 2016. Since receiving his JD from Brooklyn Law School in 2016, he has worked for Deutsche Bank as a Corporate Finance Compliance Associate.
• A Computer Science and Mathematics majors, worked as a Research/Senior Research Analyst for Community Behavioral Health in Philadelphia, PA from June 2013 to April 2015 and since receiving his Masters in Information and Data Science from University of California-Berkeley has worked for IntegriChain in Philadelphia, PA, first as a Data Scientist and now as a Senior Data Scientist and Team Lead.
• A Biological Sciences major, worked as a Research Assistant at Rhode Island Hospital from June 2013 to August 2015 and after receiving her Masters in Pharmacology and Drug Development from Tufts University in May 2015 has worked as a Research Associate for Aigos Pharmaceuticals in Cambridge, MA.

Started own company or nonprofit organization
• An Anthropology major, founded The Green Onion, LLC, “an agro-community center situated in the Black Dirt Region of the Hudson Valley with a local market, events, and education.”
• A Mathematics major, co-founder and CTO of mPharma: “We work with Payers, Providers and Drug Manufacturers to develop solutions that make drugs accessible and affordable for Patients across Africa.”
• An Art History major, co-founded mPharma with the classmate mentioned above and serves as CPO.

Volunteer work followed by employment
• A Biological Sciences major, Special Volunteer at the National Institutes of Health in Washington DC from June 2013 to June 2015, and now works at the National Museum of Natural History in Washington DC as a Collections Move Assistant as of September 2017.
• An Environmental Studies major, served as AmeriCorps Volunteer at City Year in Chicago Heights, IL from August 2013 to June 2014. Now a Service & Sales Support Specialist at Merrill Edge in Rolling Meadows, IL as of September 2017.
• A Government and History majors, Job Developer for Refugees-Catholic Charities Community Services for the Jesuit Volunteer Corps in Phoenix, AZ from August 2013 to 2014. Went on to be an Assistant Rowing Coach at Fairfield University, then an Associate at Lack+Daily (Recruiting) in South Norwalk, CT, and is currently a JD Candidate at the University of Connecticut School of Law, with degree expected in 2019.

Fellowship, quasi-employment or funded research
• An Environmental Studies major, Fulbright recipient conducting research for the U.S. Department of State in Sichuan, China from August 2013 to May 2014. Went on to become a Staff Scientist at Langan Engineering and Environmental Studies and is now a PhD Candidate at the University of Pittsburgh.
• A Dance major, Fulbright recipient conducting dance anthropology research in Nicaragua from May 2013 to October 2014. Now a fitness instructor and studio manager at 305 Fitness in New York, NY as of January 2018

Freelance work / work in theater, film, TV, dance etc.
• A Dance, Sociology, and French major, has had several acting roles and choreographed/directed in the greater New York City area for the Emerging Artists Theatre, Wallis Knot Theatre, and others.
• An International Relations major, has done videography and editing for Urbaneer Creative and RGTV, started his own video series called The Student Debt Project and acted as a Cinematographer and Director for the series ‘Comfort Theory’

Some of our graduates follow career paths that appear unrelated to their undergraduate coursework or majors, although in a number of cases, graduates’ jobs relate to athletics or other co-curricular activities they participated in while at Connecticut College. For example, one former member of our sailing team is currently assistant sailing coach at Stanford University and previously served as a coach at Falmouth Yacht Delivery in Falmouth, MA. Another student became a certified personal trainer at the University of Maine, where he remains, after earning another bachelor’s degree in Dietetics at that institution.

DETAILS OF GRADUATE STUDY
As noted above, as of the spring 2018 semester, about 21% of the Class of 2013 members we could locate were currently enrolled in a higher education program or had just graduated. More broadly, we found evidence that at least 203 of the 446 members of the Class of 2013 (almost 46%) had enrolled in some sort of post-Connecticut College education. This is consistent with prior findings that about half of our students ultimately complete some sort of post-baccalaureate schooling—most resulting in a graduate or professional degree or certificate, but some consisting of non-degree coursework. (See Appendices 3 and 4 for complete listings of these graduates’ degree completions.) Figure 3 indicates the institutions attended by three or more graduates. The 83 students represented in this figure account for about 42% of all graduate degrees by Class of 2013 alumni.

The table below indicates the types of degrees students have earned or are pursuing. In total, 110 degrees or credentials had been completed by Class of 2013 alumni as of May 2018, with another 100 or so in progress. The type of degree program could not always be determined because, in many cases, National Student Clearinghouse data indicates that a student was enrolled in a given semester but does not specify the program or the degree being pursued.

From the available information, then, we can say that the most common graduate degree among our students five years out is a nonterminal master’s degree, such as a Master of Arts or Master of Science. These degrees account for about half of graduate degrees earned by the Class of 2013.

In some cases, students who have earned one degree are still enrolled and presumably en route to a subsequent degree (e.g., working to complete a Ph.D. after having earned a master’s degree). We also see in these results several examples of students completing post-baccalaureate accelerated bachelor’s programs in nursing.

These raw data on graduate and professional school enrollments do not capture the extent to which our alumni excelled in their graduate school programs, earning scholarships, fellowships, teaching assistantships, or other awards; serving in student government or other organizations; working in research laboratories; serving on law review editorial boards or winning moot trial competitions; authoring or co-authoring peer reviewed publications in their fields; or completing career-related internships during graduate school at law offices or governmental agencies. Examples include:

- A Class of 2013 graduate who went on to graduate from the University of Connecticut School of Law, Class of 2016. Activities included Connecticut Law Review, Moot Court Board, Moot Court TA, Lawyering Process TA, Women’s Law Student Association and Intern at The Children’s Law Center of Connecticut from September 2015 to April 2016.
- A Class of 2013 graduate who is pursuing an MBA from the University of Connecticut School of Business and a PhD in Cellular and Molecular Biology simultaneously. Has been a graduate assistant teaching several courses, an Entrepreneurial lead in an intensive business model development program, an undergraduate research mentor and is currently an early development and neurology intern at Vertex Pharmaceuticals in Boston.
- A Class of 2013 graduate who went on to graduate from the University of Virginia School of Law, Class of 2017. Served as Articles Editor and Managing Editor of Publication for the Virginia Journal of International Law; was a member of the American Constitution Society and of Virginia Law Women.
**STRENGTHS AND LIMITATIONS OF THE DATA AND RESEARCH DESIGN**

The investigation described in this report did not include a traditional alumni survey in which graduates are contacted and asked to self-report their current activities, graduate degrees earned or in progress, reflections on their college experience, etc. While that approach has its place in institutional research, response rates are typically low and the results may be skewed in terms of over-representing graduates with strong ties to the college and/or more positive outcomes to report.

Our primary approach was to perform Internet searches on each graduate from the Class of 2013. Each graduate was searched using Google and/or Bing, using the person’s name and “Connecticut College” as the initial search terms. In many cases, this yielded an immediate “hit” that appeared to contain current, reliable information about the individual. We found LinkedIn pages for about 78% of our graduates, although not all of them contained current information. LinkedIn profiles are becoming more and more common among professionals and thus represent a valuable source of information on graduates. As these profiles become more common, their quality as a data source improves to the extent that people recognize the importance of keeping their profiles accurate and current. Their limitations include difficulty in determining when they were last updated and the possibility that a position listed as extending from some date in the past up through the “present” is in fact not the person’s current position. Other common alumni data sources that we located were employers’ web pages and graduate program web pages and in very few instances, a Facebook page.

Privacy protections on Facebook make it a much less useful means of learning about graduates with whom one is not “friends.”5 Unlike, say, five years ago, most people’s Facebook privacy settings today make it impossible to glean much information about “non-friends”. Facebook profiles may be useful, however, in clarifying a person’s current location, which can then be used in conjunction with other data to pin down a person’s activities.

Data from National Student Clearinghouse (NSC) records is very reliable since it is provided directly by institutions rather than from individuals. Its limitations include less-than-100% participation by all U.S. colleges and universities, and no participation by foreign universities. There is also variation in what details institutions report in terms of degree completion, the type of degree earned, and the degree field. Nonetheless, NSC data allowed us to determine outcomes for many alumni for whom other data could not be found. In many cases, students reported on their LinkedIn having attended or received degrees from universities that do not submit data to the NSC, such as foreign universities like the London School of Economics. This information was also included to get a more accurate picture of post-Connecticut College schooling.

**DISCUSSION**

The results of this investigation suggest that, five years after graduating, nearly all of our students are either employed or in graduate school. As the job market continues to strengthen, the unemployment rate for college

---

4 LinkedIn, according to Fortune.com, reached half a billion users in April, 2017. It also had over 10 million active job posts at the time. It is becoming increasingly common for employers and job-seekers to have a presence on LinkedIn. See http://fortune.com/2017/04/24/linkedin-users/

5 Since the Cambridge Analytica scandal earlier this year, people are becoming increasingly cautious about their Facebook privacy settings and social media usage in general. In a non-scientific survey put forward by The Atlantic following the events, Overall, 78.8 percent of people said they were “very” or “somewhat” concerned about the privacy of their information on social media, and 82.2 percent said they self-censor on social media. See John Nazca, June 7th, 2018, https://www.theatlantic.com/technology/archive/2018/06/did-cambridge-analytica-actually-change-facebook-users-behavior/562154/ A poll from NBC also showed 15% of people saying they would use the site less. See Anita Balakrishnan, April 20, 2018, https://www.cnbc.com/2018/04/20/some-facebook-users-curbed-use-after-cambridge-analytica-gbh-survey.html
grads has been at a steady decline and this is reflected in our findings. Very few of our graduates appear to be unemployed. As we might expect with graduates from a liberal arts college, career paths vary widely, ranging from students who secure a job immediately upon graduation that they stay in for many years, to students who hold a variety of positions for short periods of time – often a combination of paid and unpaid work – before going to graduate school or securing a full-time position that is likely to be a career. While some of our students enroll directly in graduate programs the fall following their graduation, many wait several years before doing so, or take coursework outside of a formal graduate program. Some graduates, particularly those in the arts, work on theater, dance, television, or film projects that start and finish, rather than constituting “9:00 to 5:00” positions that are easier to characterize as traditional jobs. Moreover, some students are self-employed or do freelance work that may be directly related to their major in college or previous work experience, while still being difficult to characterize as full-time salaried employment.

In sum, our students’ post-graduation lives are complex and interesting, and any additional moves by the federal government or others to request or require “outcomes” data will hopefully be accompanied by standardized data definitions and reporting standards that will allow colleges and universities to accurately and meaningfully characterize these activities. At Connecticut College, we have a great story to tell about our graduates’ achievements, and this research helps us characterize them in ways that fully capture the complexity of many of our students’ post-Connecticut College lives as citizens in a global society.

6 According to the Bureau of Labor Statistics, as of January 2017, the unemployment rate for people age 25 and older with a bachelor’s degree or higher was 2.5%, much lower than it had been in previous years. See [https://www.bls.gov/opub/ted/2017/unemployment-rate-2-point-5-percent-for-college-grads-7-point-7-percent-for-high-school-dropouts-january-2017.htm](https://www.bls.gov/opub/ted/2017/unemployment-rate-2-point-5-percent-for-college-grads-7-point-7-percent-for-high-school-dropouts-january-2017.htm)

7 The “Student Right to Know Before You Go Act” legislation introduced in the U.S. Senate and House of Representatives on May 9, 2013 and in subsequent years since then would compel institutions to “collect and publish statistics on past graduates--including graduation rates, average student loan obligations and average starting salaries.” See Jermaine Taylor, “New Bill to Colleges: Prove Your Worth,” May 18, 2013, [http://finance.yahoo.com/news/bill-colleges-prove-worth-183402065.html](http://finance.yahoo.com/news/bill-colleges-prove-worth-183402065.html). The Student Right to Know Before You Go Act of 2013 (S. 915 and H.R. 1937) gives only general outlines of exactly what data institutions would be required to submit as part of an expanded set of annual IPEDS surveys, leaving much of that determination to the U.S. Secretary of Education. It appears that institutions would not be responsible for submitting salary data, which would come instead from the Social Security Administration using lists of graduates provided by institutions.
APPENDIX 1. Current employment of Class of 2013 graduates, sorted by major

The following listing helps answer the question "What types of jobs might I get if I major in X?" Results underneath each major indicate the employer, the job title, and the location. If a student completed more than one major at Connecticut College, their job is listed under each one.

### American Studies
- Unilever ● Assistant Category Manager, Foods ● Englewood Cliffs, NJ
- ICAP ● U.S Treasury Bond Broker ● Greater New York City Area
- Christie's ● Head of Sale Management ● New York, NY
