CAMPUS SAFETY DEPARTMENT

ANNUAL FIRE SAFETY REPORT
AND
FIRE STATISTICS
2022 CALENDAR YEAR

270 Mohegan Avenue
New London, Connecticut 06320

Emergency: internal extension 2222 or 2223
Routine Calls: (860) 439-2222 or internal extension 2222
The Annual Security Report and Crime Statistics can be found here

Fire Alarm System
Most campus buildings, including the residence halls are equipped with the Simplex TM fire
alarm system, which consists of smoke detectors, heat detectors and pull stations. When
initiated, these detectors or pull stations cause an audible and visual alarm in the building as well
as audible and visual alarm at the Control Center, where Campus Safety personnel are stationed.
In addition to fire information, the Powerhouse fire alarm system displays facility operations
information at the Dispatch Center.

Sprinkler System
Some administrative buildings and academic buildings, and all residential halls at Connecticut
College are equipped with either dry or wet sprinkler systems, which are activated by heat
sensors.

Fire Drills
Fire drills for residence halls are held each semester (twice a year). Fire drills are supervised by
Campus Safety personnel with assistance from Residential Education and Living staff. Fire
Drills for academic/administrative buildings are held once a year. The Director of
Environmental Health and Safety provides fire drill and fire extinguisher training for
Housefellows at the beginning of each academic year. Documentation for Fire Drills is kept in
the files of the Director of Campus Safety and Emergency Operations. The documentation for
fire extinguisher training is kept by the Office of Residential Education and Living. All Fire
Drills are unannounced.

Fire Drill/Building Evacuation Procedures

General Building Evacuation Procedures
Building evacuations will occur when the evacuation alarm sounds and/or upon notification by
the Emergency Response Coordinator or the Department of Campus Safety. The following
procedure will be followed in the event of an evacuation:

● When the building evacuation alarm is activated during an emergency, head to the
  nearest marked exit and alert others to do the same.
● Assist disabled individuals in exiting the building. Do not use the elevators in case of
  fire or earthquake.
● Once outside, proceed directly to the appropriate “Designated Assembly Area.” Stay
  there until an accurate headcount is taken and you have been told it is safe to leave, or
  are directed to an alternate location.
● Keep streets, fire lanes, hydrant areas and walkways clear for emergency vehicles and
  personnel.
● DO NOT return to an evacuated building unless told to do so by a Connecticut
  College or Fire Department Official.
Residence Hall Evacuation - House Fellow/REAL Staff Responsibilities
- When the alarm is sounded, immediately report to the designated assembly area.
- As the residents exit the building and report to the designated assembly area, conduct a roll call, using the dorm resident list.
- Report to a Campus Safety Officer with the names and room numbers of any residents who are unaccounted for, or are known (or presumed) to be elsewhere. The Department of Campus Safety will attempt to contact these individuals. Under no circumstances should anyone re-enter the building to look for missing individuals. Leave searching the building to the Fire Department.
- Instruct residents to remain outside until the Department of Campus Safety sounds the “All Clear.” Ensure that residents stay clear of emergency equipment and vehicles. In case of inclement weather, the Department of Campus Safety will direct residents to another building to await the “all clear.”

Residence Hall Evacuation - Resident Responsibilities
- Upon hearing the alarm, immediately exit the building and report to the designated assembly area, shutting all doors and windows on the way out. Do not use the elevator, as it may shut down, trapping occupants inside.
- Assist individuals with disabilities from the building. If the disabled individual is on an upper floor and is unable to evacuate (or be evacuated), assist them to an "area of refuge" in a student room, to await assistance from the Fire Department. Stuff clothing under the door to keep smoke out. Call 911 to inform the dispatcher of your location.
- Report to the House fellow or (or REAL staff member) who will be taking roll call.
- Report the whereabouts of residents who have not answered the roll call, and are known (or presumed) to be elsewhere (Class, off campus, etc.). Campus Safety will attempt to contact these individuals. Under no circumstances should anyone re-enter the building to look for missing individuals. Leave searching the building to the Fire Department.
- Report any pertinent information (smoke, flames, smells, injuries etc.) to a Campus Safety Officer.
- Stay calm and do not interfere with emergency responders.
- DO NOT attempt to re-enter the building, for any reason, until Campus Safety or the Fire Department sounds the “All Clear.”

Academic and Administrative Building Evacuation - Faculty, Department Head, Supervisors and/or Lead Person Responsibilities
- When the alarm is sounded, immediately report to the designated assembly area. As occupants exit the building and report to the designated assembly area, conduct a roll call, ensuring that all individuals for whom you are responsible are accounted for.
- Report to a Campus Safety Officer with the names of any individuals who are unaccounted for. Campus Safety will relay that information to Fire Department personnel. They are equipped to re-enter the building to look for missing individuals.
● Instruct occupants to remain outside until Campus Safety sounds the “All Clear Signal.” Ensure that building occupants stay clear of emergency equipment and vehicles. In case of inclement weather Campus Safety will direct occupants to another building to wait for the all clear.

Academic and Administrative Building Evacuation - Building Occupant Responsibilities
● Upon hearing the alarm, immediately exit the building and report to the designated assembly area, shutting all doors and windows on the way out.
● Assist individuals with disabilities from the building. If the disabled individual is on an upper floor and is unable to evacuate (or be evacuated), assist them to an "area of refuge" in a classroom, office or in a stairwell that can be isolated by tightly closed fire doors to await assistance from the Fire Department. If seeking refuge inside the building, stuff clothing under the door to keep smoke out, and call 911 to inform the dispatcher of your location.
● Report to your faculty instructor, supervisor or Work Leader, who will be taking roll call.
● Report the whereabouts of occupants who have not answered the roll call, and are known (or presumed) to be elsewhere (off campus, etc.)
● Report any pertinent information (smoke, flames, odors, etc.) to a Campus Safety Officer.
● Stay calm, and do not interfere with emergency responders.
● DO NOT attempt to re-enter the building for any reason, until Campus Safety or the Fire Department sounds the “All Clear”.

Fire Safety

In compliance with the Connecticut State Fire Code, Connecticut College has adopted the following policies and procedures to reduce the risk of fire.

Prohibited Items
The following items are prohibited in all residential buildings (houses, rooms or apartments):
● Open-coiled electrical heating appliances (including toasters, toaster ovens, hot plates etc.)*
● Candles and incense
● Space heaters
● Any lamp that uses flammable liquids or gases
● Halogen lamps/bulbs
● Flammable liquids or gases such as, but not limited to gasoline, butane lighters, lamp oil, kerosene, propane and lighter fluid
● Fireworks, sparklers, etc.
● Battery powered “Hoverboards”/Electronic Scooters
● Combustible decorations (See “Interior Decorations” below)
Students may not possess the above items in any residential buildings. Items found in these locations may be confiscated and stored or disposed of at the student’s expense. Possession of prohibited items may also result in a referral to the student conduct system.

*Small kitchen countertop appliances (UL approved and low wattage) that have an automatic shut off feature engaged at all times may be stored and used in designated kitchen spaces (apartments, Lazrus, Earth, and Abbey). These appliances may not be stored or used in bedrooms. Refrigerators must not exceed 5 cubic feet.

**Smoking**
In accordance with Connecticut State law, smoking is prohibited inside all Connecticut College buildings, including private residential rooms, hallways, or living rooms. This includes the use of electronic delivery systems (commonly referred to as e-cigarettes), vaporizers, hookahs, or similar devices. Smoking is not permitted within 20 feet outside of residential houses.

**Building Egress**
In an emergency, it is extremely important that routes of escape from the building be kept absolutely clear of obstacles that could hinder or trip as occupants try to evacuate. Storage of furniture, equipment bags, bicycles or other bulky objects in hallways and stairwells is prohibited.

**Fire Protection**
A minimum clearance of 18” is required around sprinkler heads. DO NOT position wardrobes or other furniture, or store items in such a way that it blocks the sprinkler head. Do not prop open any door that lead to hallways, especially doors leading into stairwells. Propping open doors allows the rapid spread of toxic smoke and flame throughout the building. Fire doors may remain open only if the door is equipped with an alarm activated, magnetic holdback system.

**Electrical Fire Hazards**
Overloaded or damaged electrical cords are a common cause of fires:
- Never use electrical equipment with worn or damaged cords or plugs.
- Never run electrical cords under a rug or under a door.
- Extension cords must be in the form of surge-protected power strips.
- Each two-plug wall outlet should have no more than one power strip plugged in. Never “piggyback” power strips (one power strip plugged into another).

**Interior Decorations**
- Tapestries, parachutes or other large pieces of fabric should never be hung from the ceiling. Doing so will obstruct the smoke detector and sprinkler heads.
- Light Strings (such as holiday lights) must not be strung across the ceilings, doorways, pipes or sprinkler heads.
- Combustible decorations are prohibited. (e.g., straw, hay, dried cut vegetation, etc.)
- Wall coverings or decorations constructed from combustible materials (paper, cloth, etc.) are prohibited in hallways (“Means of Egress”), with the exception of bulletin board postings (see posting policy p. 92).
- Trees or vegetation (including holiday trees) must be potted or have a root ball. They must be kept alive with regular watering to prevent fire hazards. Artificial holiday trees are preferred.
- No single wall may be covered more than 50% with decorations

**Fire Safety Equipment**
Tampering with emergency equipment is a serious violation of the Honor Code, and in some cases, may result in prosecution by the city of New London.
- DO NOT remove the battery, disconnect, cover, or otherwise render inoperable, any smoke or heat detector.
- DO NOT damage or obscure Emergency Exit signs, alarm strobes or emergency lights.
- DO NOT paint, cover or hang anything from sprinkler pipes or sprinkler heads.
- DO NOT discharge, or move fire extinguishers from their designated location (unless being used to fight a fire). DO NOT use the fire extinguisher as a doorstop.

If you become aware of any inoperable or damaged emergency equipment, please call Facilities Management at 860-439-2253 or Campus Safety at 860-439-2222 immediately.

**Using Fire Extinguishers**
- **ONLY INDIVIDUALS TRAINED IN USE OF FIRE EXTINGUISHERS SHOULD ATTEMPT TO FIGHT A FIRE.** If you have not been trained, evacuate the building, pulling the building fire alarm as you leave. For further information, contact the Director of Environmental Health & Safety at (860 439-2252.
- **Before** attempting to fight the fire, first **PULL** (or send someone to pull) **THE FIRE ALARM** to alert/evacuate occupants, and to summon help from the fire department! **This is vital!**
- **Assess the fire.** Only small, contained fires (such as a fire in a wastebasket) should be fought using a fire extinguisher. Larger fires are not likely to be successfully extinguished, and only extend the risk to the person fighting the fire.
- **Check for your own safety** before trying to extinguish a fire.
  - Are you physically capable? Fire extinguishers can be heavy.
  - Do you have escape routes? You do not want to get trapped if the fire spreads. Always fight a fire with an exit behind you.
  - Is the fire emitting toxic smoke? If you suspect this may be the case, don’t even try to fight the fire. Just evacuate. Remember that your life is more important than property; don’t place yourself or others at risk.
- **Check that the type of extinguisher is compatible for the type of fire.**

| Ordinary | **Class A:** Contains water as the extinguishing agent. Extinguishes materials that leave an ash, such as cardboard, paper, wood, and most plastics. The number indicates the amount of water it holds. Class A Extinguishers is the type found in most Connecticut College residential halls. **Geometric Symbol: Green Triangle.** |
| Flammable | **Class B:** Class B fire extinguishers are used to put out fires involving combustible or flammable materials such as oil, gasoline, kerosene and grease or flammable gases. On a Class B extinguisher, the number indicates the square footage of fire, which it can safely handle. **Geometric Symbol: Red Square.** |
Class C: A Class C fire extinguisher should be used when putting out electrical fires. Electrical fires include fires involving electrical equipment such as wiring, circuit breakers, outlets, and appliances. Geometric Symbol: Blue Circle.

Class ABC: A combination extinguisher, good for Class A, B and C type fires.

NEVER USE A CLASS “A” EXTINGUISHER ON AN ELECTRICAL FIRE, OR ON A GREASE/OIL FIRE!

Barbecues Grills
Barbecues are allowed with the following rules:

- Propane fueled grills are prohibited; only charcoal (briquette) style grills are allowed.
- To avoid storing leftover lighter fluid, only Match Light® style charcoal is allowed.
- All charcoal must be used. Storage of leftover briquettes and grills inside the residence hall is prohibited.
- Grills must be used at least 20 feet away from any structure. Grills (with no coals) must be stored 10 feet away from any structure. Connecticut State Fire Prevention Code prohibits the use and storage of any type of grill or cooking device on decks, beneath overhangs or within 10 feet of the building.
- A person who is responsible for the barbecue must be designated. Their responsibilities include:
  - Providing advance notice to the REAL Office and Campus Safety, with the date and location of the barbecue.
  - Ensuring the barbecue is conducted safely.
  - Cleanup and proper disposal of coals. (Coals are wetted and verifiably cold to the touch before disposing into a covered metal container, outside, at least 10 feet the building.)

Fireplaces
Fireplaces are to be used for fires only and not for cooking. Students may not use fireplaces until receiving official notification the fireplaces are ready for use. Only residential houses that have approved sprinkler systems may have a fire in the fireplace.

- Check to make sure the damper is open before lighting the fire. Do not close the damper until you are sure the fire is completely out (ashes cold are to the touch.)
- When starting a fire, only use a match or commercial fire lighter. Never use flammable liquids to start a fire.
- Be sure to keep the area around the hearth clear of anything that is potentially flammable (i.e., furniture, drapes, newspapers, books, etc.).
• Do not overload the fireplace. Though a roaring fire looks attractive, it's not as safe as a slower, steadier burn. A fire that is too hot can crack the chimney or firebox. Burn a couple of logs at a time.
• Make sure the firewood is loaded in a safe and stable manner. Position logs near the back of the fireplace to prevent burning wood and embers from falling out.
• Always use a metal mesh spark screen to help keep burning embers in the fireplace.
• Only burn dry and well-aged wood. Wet or green wood burns unevenly, causes more smoke, and can increase creosote buildup, which can lead to chimney fires.
• Never burn painted, treated or preserved wood, which can release toxic chemicals into the air.
• Never burn plastic because it can release toxic chemicals and cause damage to the chimney and fireplace.
• Never burn cardboard boxes, wrapping paper or trash in the fireplace.
• Never leave a fire in a fireplace unattended. Before leaving the house or going to bed, make certain the fire is fully extinguished.
• Allow ashes to cool completely before disposing of them – ashes can take a day or more to cool completely. Never empty ashes directly into a trashcan. Instead, place the cold ashes in a covered metal container located outside, at least 10 feet away from the building.
• Be sure combustible decorations are kept at least 15 feet away from the fireplace.

**Building Evacuation Procedures**

• Upon hearing the alarm, immediately exit the building and report to the Designated Assembly Area for your building.
• DO NOT use the elevator, as it may shut down, trapping occupants inside.
• Assist individuals with disabilities from the building. If the disabled individual is on an upper floor and is unable to evacuate (or be evacuated), assist them to an "area of refuge" in a student room (or in a stairwell that can be isolated by tightly closed fire doors), and await assistance from the Fire Department.
• If you are unable to evacuate, stuff clothing under the door to keep smoke out. Call 911 to inform the dispatcher of your location.
• Report to the building student staff who will be taking roll call.
• Report to the building student staff the whereabouts of residents who have not answered the roll call, and are known (or presumed) to be elsewhere (class, off campus, etc.). The student staff will provide the results of the roll call to a Campus Safety Officer.
• Report any pertinent information (smoke, flames, smells, etc.) to a Campus Safety Officer.
• Stay calm, and do not interfere with emergency responders.
• Follow all instructions from Campus Safety, or off-campus (fire or police) authorities.
• DO NOT attempt to re-enter the building for any reason, until the “All Clear” is given.

**Fire Safety Training**

Each year the Director of Environmental, Health and Safety sends out a letter to all students regarding fire safety awareness. This letter includes information on prohibited items and practices and policy.
Housefellows and Floor Governors receive training on Fire Drill procedures and protocol through the Office of Residential Education and Living. Fire safety training is also provided by the Director of Environmental, Health and Safety.

Mandatory house meetings are held at the beginning of the year. At this time, students are notified where the designated assembly areas are for their residence hall.

Campus Safety personnel, Housefellows, and Floor Governors receive fire extinguishers and fire suppression training from the Director of Environment, Health & Safety. The proper way to extinguish a fire and the different types of fire extinguishers are covered.

In case of a fire, staff, faculty or students are instructed to activate the fire alarm (pull station) if the fire safety system has not already activated the fire alarm, evacuate the building and contact Campus Safety (Fire Department). If the staff, faculty or student is trained to use a fire extinguisher, can safely fight the fire, and have a point of exit behind them, they may attempt to extinguish the fire.

**In Case of a Fire Call**
- Campus Safety: (860) 439-2222 or internal extension 2222
- Environmental Health & Safety: (860) 439-2252 or internal extension 2252
- Facilities Management –
  - Work Control Desk: (860) 439-2253 or internal extension 2253
- Emergency Weather Hotline: (860) 439-5000
  - Toll Free: (800) 596-9452 or internal extension 5000
- New London Police or Fire: 911

**Fire Log**
The Department of Campus Safety makes the Fire Logs for the most recent 60-day period open to public inspection during normal business hours (typically Monday through Friday, from 8am to 5pm, except holidays) at the Department of Campus Safety Gate House. Any fire logs that are older than 60 days are made available for public inspection within two business days of a written request. All confirmed fires occurring within or on any and all on-campus residential facilities will also be included in the Daily Crime and Fire Log. The information in the fire log typically includes the incident number, crime classification or nature of the fire, date reported, date occurred, general location of crime or fire, and disposition of each reported crime or fire. Faculty, staff, and students are encouraged to review these logs periodically to become more familiar with the types and locations of fires that may impact the College’s campus community. The Fire Log is updated within two business days of when it is reported to the Department of Campus Safety.

**NOTE:**
Future improvements to fire safety will be incorporated as required by the National Building Codes and the authority having jurisdiction.
