Student Counseling Services
COVID-19 14-Day Quarantine Coping Guide

Overview
Being in quarantine upon (-your arrival on campus, -receiving contact tracing information warranting the quarantine, -receiving a COVID-19 positive test) may be a novel and anxiety-provoking experience. One of the best methods of reducing anxiety, distress, and sadness related to anticipatedly distressing circumstances is to establish a plan for coping ahead. Student Counseling Services (SCS) has developed this resource to assist you in coping with your quarantine circumstances in a manner that facilitates your mental health and wellbeing. In addition to some guidance around establishing your coping plan we have included informational resources around COVID-19 and mental health.

Day-by-Day Quarantine Coping Checklist
Day 1: Keep yourself occupied and engaged by creating your plan for coping ahead and content for your coping tools

1. Develop some Self-Curated Collection Resources:
   - Moving-Toward-Contentment playlist → make a list of (with linked/quick/easy access if it helps) at least 10 upbeat songs for moments when your mood needs boosting… this playlist may be used for easy listening and/or for a private or communal dance party here-and-there
   - Marinating-In-The-Feels playlist → make a list (with linked access to) at least 10 songs for moments when you want to sit in the feels
   - Daily Mindfulness Meditation List → using the resources in the Additional Coping Resources section of this document (beginning on page 7) or others, create a list of at least 14 mindfulness exercises, additionally you could incorporate any regular spiritual practices that are meaningful for you on this list
   - Daily Workout Schedule → find guided workout videos (at least 14, 1 for each day) remember these are for use ONLY on the days you’re feeling well enough for physical activity. You may use the free in-room exercises resource included in the Additional Coping Resources section of this guide (beginning on page 7)
   - FME (For My Entertainment) Items → Have the things with which you typically like to occupy your mind and time, on hand
     - Podcasts

Student Counseling Services, Connecticut College
2. Go through the resources in the section entitled: Additional Coping Resources (beginning on page 7) following this section. Determine which of those resources you may want to include in your Day-by-Day Quarantine Coping Checklist.

3. Create a Quarantine Schedule that includes:
   - Course work based on deadlines and your class schedule
   - You may also want to incorporate regular journaling time
     - This may serve as a means of emotional coping and processing (see the SCS COVID-19 Journaling Resource)
     - This may also serve as a useful form of record keeping during these unprecedented times
   - Include in your schedule, the following items as DAILY activities:
     - Meals
     - Sleep
     - Physical activity (only when feeling physically well enough to do so)
     - Meditation
     - Remote social engagement time (this could be group, 1-on-1, friends, family, etc. it’s up to you)

4. Include in your schedule, the following items as meets your personal needs and academic demands throughout your 14 days:
   - Remote family engagement time - schedule time to connect with your family-of-origin and/or your chosen family members (both communal and 1-on-1 as needed)
   - Time for school work - remember it is important not to fall too far behind academically and if you find quarantine leads to more free time than you had before, it may be a great opportunity to work ahead and/or use work as a distraction
   - Time for entertainment → pleasure reading and watching

**Day 2 To Dos:**
- Regular Meals
- Physical activity (only when feeling physically well enough to do so)
- Meditation
- Schoolwork
- Remote social engagement time (this could be with a group of people, with just 1 other person, with friends, with family, etc. it’s up to you)
- Something fun/entertaining

Student Counseling Services, Connecticut College
Use of Self-Curated Collection Resources as needed
Sleep
Add your other activities (coping and otherwise) here!

- Something fun/entertaining
- Use of Self-Curated Collection Resources as needed
- Sleep
- Add your other activities (coping and otherwise) here!

Some General Notes Related to Coping with 14 Days of Quarantine

Your coping plan is for you and should speak to your needs.

- Your needs may be dynamic and changing from day to day/circumstance-to-circumstance
  - What you need to return to campus quarantine may be different from what you need to cope with self-quarantining in response to exposure to COVID-19 or a positive COVID-19 test result
- Remember to amend any part of your schedule, Self-Curated Collection Resources, etc. as needed based on your experience of using them
  - For example: If you find you don’t like a particular workout, find alternative ones to replace the ones you’re not enjoying.
- Add daily journaling to your list quarantine schedule; writing your thoughts and feelings is a great way of coping with distress… also you’re definitely going to

Student Counseling Services, Connecticut College
want to include this experience in your future memoirs so you may think of journaling as preparation for that.

A Final Note on Coping with Your 14-Day Quarantine

Please remember that by quarantining, you are actively safeguarding the health of yourself and other Conn community members. The community appreciates that gift. Know that although physically distant, you are not alone. The Conn community is with you and you have remote access to all members of your campus support system. While your situation (a 14 day quarantine) may not be the best, it doesn’t have to be the worst; you have this and many other resources to ensure that you make it through the days ahead.
