

Device (i.e. Apple TV, Amazon Fire TV Stick, Chromecast, Roku, older Kindles, etc.) registration should **only** be used for devices that **CAN'T** connect to eduroam.

Below are the instructions on how to use the Device Registration page:

- 1) Navigate to clearpass.conncoll.edu/Guest
- 2) Login with your Camel Username and Password, as shown below:

The screenshot shows the 'Operator Login' form for ClearPass Guest. It features the Aruba Networks logo and the 'ClearPass Guest' title. The form includes a 'Username' field with a placeholder '<username>', a 'Password' field with masked characters, and a 'Log In' button.

3. Once you have logged in, you will be able to Manage your devices and create new devices. This allows the device to automatically be authenticated on the Guest network.

The screenshot displays the 'Manage Devices' page in the ClearPass Guest interface. The page header includes the Aruba Networks logo, 'ClearPass Guest', and user information 'bjones (CC Device Registration)'. A navigation menu on the left shows 'Guest' selected, with options for 'Start Here', 'Create Device', and 'Manage Devices'. The main content area shows the breadcrumb 'Home » Guest » Manage Devices' and the title 'Manage Devices'. Below the title, there is a 'Quick Help' icon, a 'Create' button, and a 'Filter' input field. A table header is visible with columns for 'MAC Address', 'Device Name', 'Created', and 'Sharing'. A message states 'There are no devices to display.' and 'No matching accounts found'. A 'Refresh' button and a '20 rows per page' dropdown are also present.

Creating a New Device Registration:

1. Once you are logged into ClearPass Guest, click Create device. You will need to enter the following information
 - a. Device Name: Your Camel User Name - Device name (Example: bbjones-AppleTV)
 - b. Mac Address
 - c. You can also enable Airgroup, which will allow you to use Airplay across networks (example - computer is connected to eduroam and Apple TV device is on the CC Guest network).

To access your device with Airgroup, you have to add your Camel User Name, and any additional Camel User Names that you would like to share this device with.

The screenshot shows the Aruba ClearPass Guest web interface. The top navigation bar includes the Aruba Networks logo, the title 'ClearPass Guest', and links for 'Support' and 'Logout'. The user 'bjjones (CC Device Registration)' is logged in. A left-hand menu under the 'Guest' header contains 'Start Here', 'Create Device' (highlighted), and 'Manage Devices'. The main content area shows the breadcrumb 'Home » Guest » Create Device' and the title 'Create Device'. Below the title is the instruction: 'Use this form to register a new device.' The form, titled 'Register Device', contains the following fields:

Device Name:	<input type="text" value="<username> <Device Name>"/> <small>Name of the device.</small>
* MAC Address:	<input type="text" value="00:11:22:33:44:55"/> <small>MAC address of the device.</small>
AirGroup:	<input checked="" type="checkbox"/> Enable AirGroup <small>AirGroup uses device ownership and location information to limit the printers and Apple TVs available to network users.</small>
Shared With:	<input type="text" value="<your username>,"/> <small>Enter the usernames that will be able to use this device. Use a comma-separated list, e.g. user1,user2,user3, or blank for all users.</small>
* Registered By:	bjjones

At the bottom of the form is a 'Create Device' button. Below the form, there is a note '* required field' and a 'Manage my devices' link.
